

Identifying research themes and priorities for the National VET Research and Evaluation Program

Jennifer Gibb
Acting Manager
National VET Research and Evaluation Branch

The National Managed VET Research and Evaluation program is managed by NCVER and is overseen by the National Research and Evaluation Committee (NREC). The Australian National Training Authority funds the program and has done so since 1997. The current program of research is funded through to the end of 2003. The program of VET research is guided by the National Strategy for VET Research and Evaluation. In addition to the program of research managed by NCVER, ANTA also funds 2 key research centres and 2 research partners to conduct VET research.

J. Gibb and A. Smith of NCVER will discuss the achievements of the program since 1997 and possible directions for the program over the next three years. Participants will have the opportunity to discuss the evolving nature of the program and put forward ideas for the future.
